Does your child have Cerebral Palsy?

Were they born in 2009 or later?

Then you can register your child in the **Canadian Cerebral Palsy Registry**

Our research team has created a Canadian Cerebral Palsy Registry to better understand the causes of Cerebral Palsy (CP) in BC and across Canada.

We want to know how often children are being diagnosed with CP and where they live in the different regions of BC and the different provinces of Canada.

By looking at this information across different regions, we might be able to find risk factors and causes of CP.
