

DO YOU HAVE HUMAN MILK TO DONATE?

Our team at BC Children's and Women's Hospital is looking for fresh human milk to investigate a new method of defatting milk. Results from our project will inform future work on feeding critically ill infants who cannot digest fat.

Who can donate?

- 37 weeks gestation or later
- 3 to 52 weeks (1 year) postpartum*
- Producing at least 300ml over 48hrs

*Milk < 3 weeks postpartum will be accepted on a case by case basis

What do I need to do?

- Schedule an eligibility phone call with our team (15 minutes)
- Schedule a donation drop-off
- Collect the requested volume of milk in the refrigerator over a maximum of 48 hours
- At drop-off complete a brief questionnaire about you and your milk (30 minutes)
