

The Canadian **Donation and Transplantation** Research Program
Programme de recherche en
don et transplantation du Canada

COUNTERING THE IMPACT OF COVID-19 ON TRANSPLANT PATIENTS AND FAMILIES

Are you a solid organ or stem cell transplant recipient?

Are you a family member/caregiver to a solid organ or stem cell transplant recipient?

JOIN a NATIONAL STUDY conducted by the Canadian Donation and Transplantation Research Program (CDTRP) to share your COVID-19 pandemic experiences to help researchers reduce the negative impacts on **transplant recipients** and their **families/caregivers**.

Please note that for a family member/caregiver wanting to enroll, the associated transplant patient must be enrolled in the study first.
