

14th International Developmental Coordination Disorder Conference

The theme of the 2022 conference is: *DCD in the Real World.*

Oral and poster presentations will contribute to our understanding of children, youth, and adults who are playing, attending school, socializing, working, and living with **DCD in the Real World.**

The following streams will allow us to focus on aspects of life in the real world that are of relevance to children, youth, adults and older adults with DCD. Under each category, *examples* are provided of the types of topics that will be considered under each theme area.

LIVE

Diagnosing DCD; Best Practice; Novel Interventions; Quality of Life; Mental Health Issues; Advocacy; Economic realities; Longitudinal studies; Transitions

LEARN

Early development; Innovations in the education of preschool and elementary school aged children, middle and high school students, post-secondary education; Inclusion; Different types of learning (e.g., motor, cognitive, attention, behavioural)

Prevocational training; Vocational activity, Supportive Employment; Work/life balance, Transportation; Managing daily activities as an adult or older adult; Retirement
