Research Training Programs

Gain hands-on research experience with BC Children's Hospital researchers and develop the skills needed for a career in child health.

INSPIRE Program

- September to April
- Part-time volunteer program
- Students are matched with a mentor
- For students who have completed their first year of undergraduate studies

Summer Student Research Program

- May to August
- Studentship funding available
- Students find their own research placement and supervisor
- For students new to research

Other Ways to Get Involved
